

# Novaflex 4 your choice of comfort customised to suit you

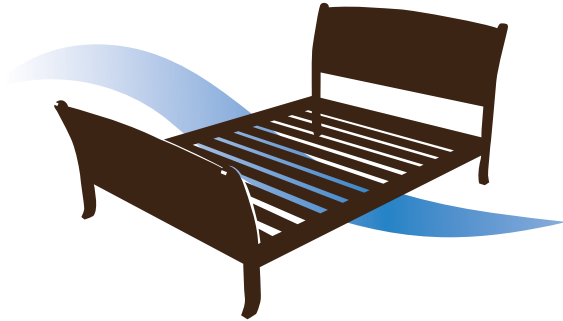

Thanks for choosing a great turnwood bed, now choose to enjoy the latest technology and quality European made with Novaflex 4

Designed with adjustable options to suit your very individual height, weight and comfort levels. Novaflex 4 allows you to easily customise each side of the bed with three comfort levels to help overcome this issue. Get the postural support you deserve with individually adjusted slats, help eliminate roll together and partner disturbance, or get some extra support with Novaflex 4 extra\* if you happen to need it. Comfort is right here in your control, so discuss your options with your instore bedding specialist. Your sleep is important, so let turnwood + Novaflex 4 help you have a great night's sleep.

# slat systems

## solid slat – benefits

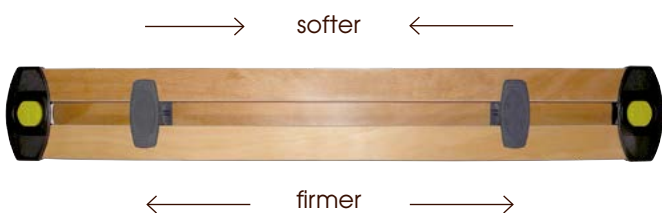

- perfect platform for all types of mattresses
- see your mattress specialists to select the right mattress for your needs
- easy to assemble and maintain
- made from chemical-free kiln dried new zealand pine
- ideal for providing a firmer and stable feel to the bed
- strong and robust

## Novaflex 4 – benefits

- ultimate comfort and support
- two individual sleep systems - perfect for wider weight variances between couples
- contours to body shape - firming or softening where needed
- prolongs mattress life - slats act as a secondary shock absorber
- can adjust for season - make softer in winter for snuggling and firmer in summer when hotter
- more efficient with a latex or low profile mattress
- see your mattress specialists to select the right mattress for your needs
- only have to replace slats after many years - not the whole frame
- stabilises your sleep posture
- absorbs all movement like a leaf spring
- quality european slats and shoes
- tested with 45kg weight bearing per slat

## Novaflex 4 extra *\*Not supplied with standard slat system*

For those that require additional support Novaflex 4 extra can be added to slats that carry the main weight, generally from shoulders to hip or can be used in any area requiring extra support. Level of support is adjustable by moving the 3 way spreader in or out.
